Professional Experience

Kodo Technologies Pvt Ltd (Software Developer)

Remote

May 2022 - Present

- As a frontend developer I have been focusing on bug fixes, implementing new features, and enhancing overall user experience.
- Instrumental in improving the user interface of the app, contributing to a more user-friendly and visually appealing design.
- Developed and maintained the company website using WordPress, showcasing technical versatility and ability to work with diverse platforms.
- Collaborated closely with cross-functional teams to ensure seamless integration of frontend components with backend systems.
- Actively participated in code reviews, providing constructive feedback to team members and ensuring code quality standards.
- Received the "Rising Star" award at Kodo for outstanding contributions and demonstrated excellence in software engineering.

Huntment (Web Developer)

Dubai

Nov 2021 - April 2022

- Initiated career as a web developer, playing a key role in creating websites from inception to completion.
- Collaborated closely with the design team to bring creative concepts to life, ensuring the development of visually appealing and functional websites.
- Successfully contributed to the creation of multiple websites for clients, demonstrating versatility and adaptability in a fast-paced environment.
- Coordinated with cross-functional teams to meet project deadlines, fostering effective teamwork and project delivery.
- Gained valuable experience in the end-to-end website development process, from conceptualization to implementation.
- Developed and maintained a strong understanding of web development best practices and emerging trends.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, SCSS

Web Development Frameworks: Angular, Ionic, Bootstrap, Angular Material

Content Management Systems: WordPress

GraphQL: Consumed and registered mutations and queries in frontend. Also Proficient in using Postman for testing GraphQL endpoints

Database Management: Experience using DBWeaver for managing databases and editing queries locally

Projects

WordEmbed (<https://github.com/isnayousuf/WordEmbed>)

- JavaScript application that provides the details of a word when selected on a webpage. The details include word meaning, word pronunciation, audio spelling, description, and part of speech. WordEmbed works by embedding the script in any third party website.

Portfolio Website (<https://www.isnayousuf.com/>)

- Developed a personal portfolio web application to showcase projects, skills, and professional experience. Utilized HTML, CSS, JavaScript, visually appealing user interface and Integrated responsive design principles for optimal user experience across various devices.

Weather forecasting web application (<https://github.com/isnayousuf/weather-application>)

- Developed a web application for real-time weather forecasting using JavaScript in which I Integrated OpenWeather API to fetch accurate and up-to-date weather data. Implemented user-friendly features for location-based weather predictions and forecasts.
