Projects

1) WordEmbed:

WordEmbed is a JavaScript application that provides the details of a word when
selected on a webpage. The details include word meaning, word pronunciation, audio

spelling, description, and part of speech.WordEmbed works by embedding the script in any third party website.

Tech Stack: Javascript, CS

2) Weather forecasting web application:

This web application provides weather details for the location that is searched by the user. In this web application I have used the open-weather API to fetch the weather details of any place.

Tech Stack: Html, CSS and JavaScript.

3) Portfolio Website

The portfolio website mentioned above is one of the projects that I have done. This single page website has been created to get a better hold on my skills.

Tech Stack: Html, CSS and JavaScript.

4) CSS Artwork:

A series of CSS designs and artwork. The artwork is publicly available on github.

Tech: CSS, HTML
